

IES Canadian ACI

Comply with Canada's ocean cargo importation initiative

Expedite and simplify filing your cargo manifest for shipments imported into Canada 24/7.

As part of the Customs Action Plan implemented by the Canada Customs and Revenue Agency all ocean cargo and conveyance into Canada must be reported electronically to the CBSA 24 hours in advance of sailing to manage risk.

IES' ACI Web application is certified by and meets the requirements of the Canada Border Services Agency's Advance Commercial Information initiative. With fast online authorizations you avoid clearance delays and provide superior service to your customers.

File and manage your bills of lading securely. Minimize effort by populating the fields using databases of frequently used and repetitive information such as: shipper, consignees, delivery and notify parties. Rest assured that your sensitive manifest information is transferred directly to Canadian Customs with encrypted shipper and consignee information and your cargo is authorized to move. Receive CBSA confirmation minutes, after submission. Status messages are displayed in the IES ACI system to confirm file acceptance. Errors in your record are quickly displayed, so you can correct and resubmit the record in time to sail.

Enter container events such as Arrival Notice Has Been Sent To The Customer, Damage Survey Completed, Grounded Off Train, US Department Of Agriculture Hold For Fumigation and Vessel Delayed.

Powerful search functionality locates existing voyages, containers, purchase orders, bills of lading and departures. View a summary by CBSA status to see the number of files processed, deleted, in failed edit status, pending, rejected, waiting or not submitted to help monitor your volume and highlight filing errors. Each status category is linked to those filings for in-depth review.

Get started in a matter of days using the intuitive Web interface or use flexible EDI, XML and flat file adapters to integrate IES Canadian ACI directly with your current systems.

Positively impact your bottom line by eliminating the liability and fees from paying carriers to file on your behalf.

Key Benefits

- *Comply with Canada's ocean cargo and conveyance advanced electronic reporting regulation*
- *Avoid penalties or sanctions by the Canada Customs and Revenue Agency*
- *Eliminate paying exorbitant fees to carriers to file on your behalf*
- *Access encrypted shipment data over the Internet 24/7*
- *Minimize data entry using menus of repetitive information*
- *Track shipment milestone events*
- *CBSA status statistics monitors volume and highlights filing errors*
