

10+2: Are You Ready?

Importer Security Filing Interface [ISFI]

Transmit error-free filings to Customs & Border Patrol

Fully Comply with ISFI.

As the US Government releases the requirements for ISF (previously known as 10+2), it is critical to have a plan in-place. Customs Brokers, Suppliers and NVOCC's will be dramatically affected by the ruling. IES's web-based application, called the Importer Security Filing Interface or ISFI, with its full connectivity to the IES Customs House Brokerage [CHB] module, offers one complete solution to meet these new requirements.

With ISFI, optimize business processes in the most direct, effective manner possible. In addition, improving supply chain velocity creates a significant competitive advantage for you.

Customize: Generate Templates to populate key data elements within the entry. Improve efficiency while dramatically increasing accuracy. Agents and Suppliers can be trained quickly to execute on behalf of the Importer of Record.

Optimize: The integration of the ISFI web-based Solution and the IES CHB module streamlines processes, reduces errors and minimizes key strokes while saving time and money.

Collaborate: The ISFI offering includes Commercial Invoice and Parts Number Database Applications that can be used by Agents, Suppliers, Importers of Record or Customs Brokers in a secure way to Create the CI while meeting CBP's requirements.

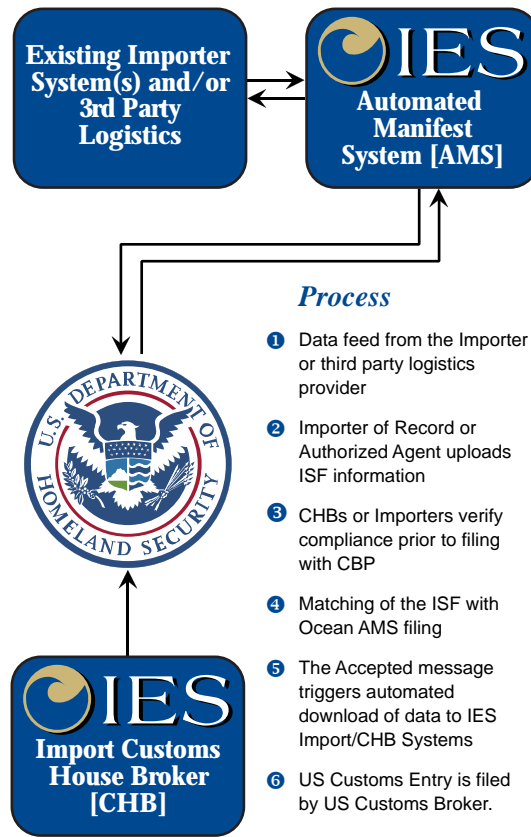

Manage: Using our Security model, only those parties to a transaction you directly authorize are allowed to participate. You are in control of all data.

Expand: Add IES's Advanced Manifest System [AMS] and/or the SCOPE Supply Chain Management to add Visibility to your customer service arsenal. All IES offerings are highly integrated.

According to CBP, "If the principal fails to comply with the proposed Importer Security Filing requirements, the principal and surety (jointly and severally) would pay liquidated damages equal to the value of the merchandise involved in the default," or more plainly stated, failure to comply with CBP's guidelines will eventually result in fines. Now is the time to act! ISFI will streamline you into Customs' ISF compliance.
